Language of Behaviour Workshop Series

19 - 21 September 2019

For Teachers, TAs, Therapists and Parents

Meet Steven Forth M.Ed, BCBA

Steven has been helping families and schools understand the language of behavior and providing practical behavioural solutions for the past 16 years. He is a Board Certified Behaviour Analyst and holds a Masters in Curriculum, Instruction & Applied Behavioural Analysis from Arizona State University. He works with families and schools (at Elementary, Middle & High School levels), advocating to transform the lives of students through private consultation, professional development, and family workshops. He is dedicated to developing natural environment plans for ABA programs that follow the interests of the individual. He deeply believes that a well-designed sensory environment creates infinite learning opportunities for all.

For Parents & Therapists

For Teachers, TAs & Therapists

Saturday, 21 September 2019
(at Farm de Lek in Nakhon Nayok)

Learning in a Sensory Friendly Environment (10:30 am - 12:00 pm)

1:1 Private Consultation with Steven (1:00 - 4:00 pm) - 3 appointments available

Join us for Steven's inspirational and practical workshops. He will introduce participants to methods of understanding the language of behaviour. The workshops will provide simple techniques to encourage adaptive social interactions, self-advocacy, and strong executive functioning skills. There will be information provided on how to create a comfortable sensory environment, to encourage learning through interest-based exploration. Participants will role-play or create a useful system to apply in their classroom, therapy practice and / or home.

"The workshops will explore the theoretical and research based reasons why it is best practice to encourage learning through internal motivation rather than external pressure and institutional expectations."

Steven Forth
